The new ISO 9001
BSI’s Best Practice Transition Journey
ISO 9001:2015 Best Practice Journey from Revision to Transition

ISO 9001, the world's most popular standard for quality management is being revised to ensure that it maintains its relevance in today's market place and in the future. Through our experience of developing standards and managing thousands of client interactions every year, BSI knows the best practice way of transitioning to a new standard smoothly. Our comprehensive suite of training and support material has been structured to guide you and your organization through the revision process, every step of the way.

Buy a copy of the Final Draft International Standard and/or ISO 9001 Standard on publication as soon as possible

Understand some of the new requirements in more detail, visit the BSI website for the latest whitepapers

The Importance of Leadership
Understand how leadership is being incorporated in all new ISO Standards and what this means in practical terms

Process versus Procedures
Understand the difference between a process and a procedures approach and how this relates to the new High Level Structure

The Importance of Risk in Quality Management
Understand how to establish a systematic approach to risk and the benefits this will bring

Developed by experts, our range of transition courses ensures you fully understand the changes and the core requirements

Senior Management Briefing
This executive session highlights the benefits of an effective QMS and the leadership responsibilities

Transition
Learn about the new ISO high level structure (HLS) and the key changes between ISO 9001:2008 and ISO 9001:2015

Implementing Changes
Discover how to apply the key changes to ISO 9001:2015 and formulate a transition action plan for your organization

Auditor Transition
Combined with the transition course, you'll not only learn about ISO 9001:2015 but also build up your auditing skills

Deep Dive
Exploring in greater detail the 4 critical areas of the new standard: Process Approach, Risk-based Thinking, External Provision and Leadership

BSI has developed a comprehensive toolkit to help you understand the changes and implement them in your organization

Transition Guide
Provides an overview of the new High Level Structure (HLS) and the requirements of the new standard

Self-Assessment Checklist
Helps you assess your organization's readiness for an ISO 9001:2015 certification assessment and identify any gaps

Mapping Guide
An overview of the changes, deletions, new or enhanced requirements between ISO 9001:2008 and the DIS ISO 9001

Internal Communications Pack
To help you communicate the changes and new requirements within your organization including leadership briefing and presentation

BSI has a wide range of services to help you implement the changes and understand how well you're doing

GAP Assessment
BSI can carry out an optional gap-analysis to help you identify any weaknesses or omissions prior to formal assessment

BSI Action Manager or Entropy™
Manage your transition as effectively as possible with business improvement software including Action Management, GAP Assessment and Training Management

Certification to ISO FDIS 9001:2015
BSI will offer unaccredited certification against the FDIS for clients who want to transition early

Transition Assessment
You will be able to transition to the new standard once it is published, ensuring that you quickly benefit from the new standard

Support Services
5 Key Steps for a Successful Transition

Don’t delay – start working on your transition today

1. **Talk to your BSI Client Manager**
   - Discuss your challenges and timelines
   - Review the latest videos and whitepapers on the BSI website for background information

2. **Attend BSI’s Training programme**
   - Understand the new requirements faster and in greater detail by attending our training courses; from introduction through to deep dive modules which explain the new areas in greater depth.

3. **Communicate with your organization**
   - Talk to your leadership team about the new requirements
   - Communicate the revision to your wider organization to gain buy in
   - Send regular updates on progress

4. **Set up an Internal Project Team**
   - Download BSI’s transition toolkit which will guide you through the transition
   - Conduct a gap analysis against your current system
   - Create an implementation plan and monitor progress
   - Take a fresh look at your QMS
   - Implement the new requirements on leadership, risk and context of the organization
   - Change your documentation to reflect the new structure

5. **Gap Transition Assessment**
   - BSI can conduct a gap assessment to help you identify any weaknesses prior to formal assessment
   - Transition to the new standard as soon as possible to gain the additional benefits.
